

# San Joaquin Science Olympiad Invitational

Help spread the passion for science at the San Joaquin Science Olympiad Invitational tournament hosted by Tracy High School and West High School in Tracy, CA, on Saturday, January 24, 2015

The tournament will bring to Tracy hundreds of high school students, members of Science Olympiad teams, from San Joaquin County, the Bay Area, and all over Northern California.

We need people to help run some of the 23 science events of the tournament, ranging from biology, physics and chemistry, to astronomy and earth science, as well as the scientific process, engineering, and the use of computers and technology.

We have detailed competition rules and additional material from the National Science Olympiad organization, as well as teachers and experienced Science Olympiad coaches to guide and help where needed, but we are looking for subject matter experts in the various fields of science to help enhance the student experience, in addition to community members simply willing to lend a hand during this day of science extravaganza!
